STUDENT

I am currently a student actively seeking an internship opportunity in the field of **backend development**, with a desired duration **from February to May** (3 months). My goal is to gain practical experience and contribute my skills to a dynamic team while furthering my knowledge in backend technologies.

SKILLS

- Backend(Main): Java framework(Spring, SpringMVC , Mybatis , SpringBoot, SpringSecurity) and MySQL.
- Frontend(Basic):HTML,CSS,Javascript, React.js, jQuery,Ajax, Axios, XML
- Tools: Git, IDEA, Postman, VS Code
- Concept: RESTful

PERSONAL PROJECT

MyBlog <link>

This is a blog project with a frontend-backend separation architecture, built on Spring Boot and React.js. The backend utilizes MySQL as the database, interacts with the SpringBoot through the MyBatis framework, and employs Spring Security for user authentication. On the frontend side, React.js is used for development, and communication with the backend is facilitated through Ajax and Axios.
